2200 Churchill Road  
Springfield, IL 62704

Dear Mr. Larson:

Re: Proposal to Implement a Revised Scope of Work for  
Dead Creek Sites Remedial Investigation/Feasibility  
Study

Ecology and Environment, Inc., (E & E) is pleased to provide you with the enclosed five copies of its proposed revised scope of work for the Dead Creek sites.

This scope of work specifically addresses those areas of field study required to best achieve IEPA's objective of NPL and/or SRAPL placement of the Dead Creek sites. While the original scope of work, defined in the RFP, provided an excellent program based upon data then available, subsequent data acquisition, site investigations, and discussions of project objectives have suggested a need to revise the scope of work. The IEPA, since the outset of the project, anticipated the probable need to revise the scope of work during the course of the project.

The enclosed proposal of revised scope of work reflects E & E's assessment of the work which should be completed for project area sites. It should be considered a flexible scope of work which could be modified to incorporate or delete work as determined by the IEPA.

Mr. Jeff Larson
